Subject Index

Volume 23, January-June 1994

A

Acetylcholine
Effect of Potassium on Vasodilation to Acetylcholine in Essential Hypertension, 485

Acromegaly
Does Plasma Immunoreactive Ouabain Originate From the Adrenal Gland? I-102

Acute-phase proteins
Angiotensinogen: An Acute-Phase Protein? I-126

Adenosine
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402
Platelet Calcium Transport in Hypertension, 31
Renal Arteriolar Angiotensin Responses During Varied Adenosine Receptor Activation, I-114

Adenyl cyclase
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402
Parathyroid Hormone/Adenylate Cyclase Coupling in Vascular Smooth Muscle Cells, 468

Adipose tissue
Molecular Mechanism of Adipogenic Activation of the Angiotensinogen Gene, 364

Adrenal cortex
Is Ouabain an Authentic Endogenous Mammalian Substance Derived From the Adrenal? 632

Adrenal cortex hormones
Gene Expression of 11β-Hydroxysteroid Dehydrogenase in the Mesenteric Arteries of Genetically Hypertensive Rats, 577

Adrenal glands
Does Plasma Immunoreactive Ouabain Originate From the Adrenal Gland? I-102

Adrenergic receptor blockaders
Effects of a β-Blocker or a Converting Enzyme Inhibitor on Resistance Arteries in Essential Hypertension, 83
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97

Adrenocorticotropic hormone
Diurnal Blood Pressure Variation and Hormonal Correlates in Fatal Familial Insomnia, 569

Afferent pathways
Mechanism of Cyclosporine-Induced Sympathetic Activation and Acute Hypertension in Rats, 667

Aging
Atrial and Brain Natriuretic Peptides in Cardiovascular Diseases, I-231
Correlates of Blood Pressure in Community-Dwelling Older Adults: The Cardiovascular Health Study, 59
Effects of Age and Hypertension on Autonomic Nervous Regulation During Passive Head-Up Tilt, I-82
Hypertension in the Elderly: Only the End of the Beginning, 286
Impaired Insulin Sensitivity and Maximal Responsiveness in Older Hypertensive Men, 320
National High Blood Pressure Education Program Working Group Report on Hypertension in the Elderly, 275
Role of Hypertension in Asymptomatic Cerebral Lacunae in the Elderly, I-259
Systemic Hemodynamics During Sleep in Young or Middle-aged and Elderly Patients With Essential Hypertension, 167

Albumins
Angiotensinogen: An Acute-Phase Protein? I-126

Albuminuria
Combination Treatment of Enalapril With Nitrendipine in Rats With Renovascular Hypertension, 114
Elevated Serum Insulin Levels in Patients With Essential Hypertension and Microalbuminuria, 681
Familial Hypertension and Albuminuria in Normotensive Type I Diabetic Patients, I-256
Hypertension Induced by Nitric Oxide Synthesis Inhibition Is Renal Nerve Dependent, 971
Is Microalbuminuria a Marker of Early Intrarenal Vascular Dysfunction in Essential Hypertension? 1018
Microalbuminuria in Salt-Sensitive Patients: A Marker for Renal and Cardiovascular Risk Factors, 195

Aldosterone
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179
Renal Response to Amino Acid Infusion in Essential Hypertension, I-225
Responses to Converting Enzyme and Renin Inhibition: Role of Angiotensin II in Humans, 44
Structural Remodeling in Hypertensive Heart Disease and the Role of Hormones, 869

Amiloride
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040

Amnion
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193

Amniotic fluid
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193

Angiotensin converting enzyme (See Kininase II)

Angiotensin-converting enzyme inhibitors
Angiotensin-Converting Enzyme Inhibition and the Heart, 813
Angiotensin-Converting Enzyme Inhibition Improves Cardiac Function: Role of Bradykinin, 411
Changes in Renal Angiotensin II Receptors in Spontaneously Hypertensive Rats by Early Treatment With the Angiotensin-Converting Enzyme Inhibitor Captopril, 819
Chronic Converting Enzyme Inhibition Facilitates Baroreceptor Resetting to Hypertensive Levels, I-68
Effect of Lisinopril and Metoprolol on Arterial Distensibility, I-161
Effects of a β-Blocker or a Converting Enzyme Inhibitor on Resistance Arteries in Essential Hypertension, 83
Effects of a Metalloendopeptidase-24.15 Inhibitor on Renal Hemodynamics and Function in Rats, I-235
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419
Inhibition of Angiotensin-Converting Enzyme Modulates the Autoregulation of Regional Cerebral Blood Flow in Hypertensive Rats, 781
Kinins Contribute to the Improvement of Insulin Sensitivity During Treatment With Angiotensin Converting Enzyme Inhibitor, 450
Perindopril Changes the Mesenteric Pressure Profile of Conscious Hypertensive and Normotensive Rats, 325
Renal Response to Amino Acid Infusion in Essential Hypertension, I-225
Sex Influence on Renal α_2-Adrenergic Receptor Density in the Spontaneously Hypertensive Rat, 607
Tissue Angiotensin Converting Enzyme in Cardiac and Vascular Hypertrophy, Repair, and Remodeling, 258

Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Angiotensin II
Angiotensin-Converting Enzyme Inhibition and the Heart, 813
Angiotensin II Alters Aortic Fibronectin Independently of Hypertension, 823
Angiotensin Receptor Regulates Cardiac Hypertrophy and Transforming Growth Factor-β_1 Expression, 587
Changes in Renal Angiotensin II Receptors in Spontaneously Hypertensive Rats by Early Treatment With the Angiotensin-Converting Enzyme Inhibitor Captopril, 819
Clonidine Reverses the Slowly Developing Hypertension Produced by Low Doses of Angiotensin II, 844
Defective Modulation of Angiotensin II–Induced Renal Vasoconstriction in Hypertensive Rats, 329
Effects of Angiotensin Receptor Subtype Inhibitors on Plasma Angiotensin Clearance, 853
Effects of Atrial Natriuretic Factor on Cyclic Nucleotides in Rabbit Proximal Tubule, 358
Epidermal Growth Factor–Enhanced Human Angiotensin II Type 1 Receptor, 1032
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Mechanism by Which Angiotensin II Stabilizes Messenger RNA for Angiotensinogen, I-120
Physiopathogenesis of Acute Aortic Coarctation Hypertension in Conscious Rats, I-78
Platelet-Derived Growth Factor and Angiotensin II Induce Different Spatial Distribution of Protein Kinase C-α and -β in Vascular Smooth Muscle Cells, 848
Pressor Mechanisms in Adriamycin-Induced Nephropathy With Hypertension in Rats, I-246
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179
Renal Arteriolar Angiotensin Responses During Varied Adenosine Receptor Activation, I-114
Responses to Converting Enzyme and Renin Inhibition: Role of Angiotensin II in Humans, 44
Stimulation of Vascular Glycosaminoglycan Synthesis by Subpressor Angiotensin II in Rats, I-148
Structural Remodeling in Hypertensive Heart Disease and the Role of Hormones, 869
Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Angiotensinogen
Angiotensinogen: An Acute-Phase Protein? I-126
Hypertension in the Transgenic Rat TGR(mRen-2)27 May Be Due to Enhanced Kinetics of the Reaction Between Mouse Renin and Rat Angiotensinogen, 422
Mechanism by Which Angiotensin II Stabilizes Messenger RNA for Angiotensinogen, I-120
Modulation of Renin-Angiotensin and Kallikrein Gene Expression in Experimental Hypertension, I-131
Molecular Mechanism of Adipogenic Activation of the Angiotensinogen Gene, 364
Unlike Human Hypertension, Blood Pressure in a Hereditary Hypertensive Rat Strain Shows No Linkage to the Angiotensinogen Locus, 797

Angiotensins
A Kallikrein-Like Enzyme in the Aorta of Normotensive and Hypertensive Rats, 899
Chronic Inhibition of Bradykinin B_2-Receptors Enhances the Slow Vasopressor Response to Angiotensin II, 646
Effects of Converting Enzyme Inhibitors on Angiotensin and Bradykinin Peptides, 439
Mechanisms Involved in the Cardiovascular-Renal Actions of Nitric Oxide Inhibition, 951
Nitric Oxide Influences Blood Flow Distribution in Renovascular Hypertension, I-34
Oxytocic Effect of Trypsin on the Isolated Rat Uterus, I-250
Regulation of Angiotensin II Receptors in Rat Brain During Dietary Sodium Changes, I-137
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vascular Smooth Muscle Cell Hypertrophy, I-142
Vascular Renin in the Guinea Pig: Suppression by the Renin Inhibitor Remikiren, 861
Vasoconstrictor Action of Angiotensin I–Convertase and the Synthetic Substrate (Pro^{11},D-Ala^{12})-Angiotensin I, 857

Animals, transgenic
Hypertension in the Transgenic Rat TGR(mRen-2)27 May Be Due to Enhanced Kinetics of the Reaction Between Mouse Renin and Rat Angiotensinogen, 422
Increased Cytosolic Sodium and Reduced Na,K-ATPase Activity in Transgenic Rats, I-198
Renal Effects of Captopril and Nitrendipine in Transgenic Rats With an Extra Renin Gene, 626
Transgenes, Hypotheses, and Hypertension, 428

Antibody Fab fragments (See Immunoglobulin fragments)

Antihypertensive agents
Are Renal Hemodynamics a Key Factor in the Development and Maintenance of Arterial Hypertension in Humans? 3
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903
Combined Antihypertensive and Lipid-Lowering Therapy in Experimental Glomerulonephritis, 92
Combined Versus Single Effect of Fosinopril and Hydrochlorothiazide in Hypertensive Patients, I-207
Dose-Dependent Effects of Perindopril on Blood Pressure and Small-Artery Structure, 659
National High Blood Pressure Education Program Working Group Report on Hypertension in Diabetes, 145
National High Blood Pressure Education Program Working Group Report on Hypertension in the Elderly, 275
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97
Pathophysiology and Management of Hypertension in Acute Ischemic Stroke, 131
Perindopril Changes the Mesenteric Pressure Profile of Conscious Hypertensive and Normotensive Rats, 325
The National High Blood Pressure Education Program Working Group Report on Hypertension in Diabetes, 159
Timing for Administration of an Antihypertensive Drug in the Treatment of Essential Hypertension, I-211

Aorta
A Photoactivable Source of Relaxing Factor in Genetic Hypertension, 894
Angiotensin II Alters Aortic Fibronectin Independently of Hypertension, 823
Remission of High Blood Pressure Reverses Arterial Potassium Channel Alterations, 941
Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Aortic coarctation
Angiotensin Receptor Regulates Cardiac Hypertrophy and Transforming Growth Factor-β_1 Expression, 587
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865

Apnea
Differential Effects of Digitalis on Chemoreflex Responses in Humans, 302

Aprotinin
Human Tissue Kallikrein Induces Hypotension in Transgenic Mice, 236

Arachidonic acid
Relaxation of Porcine Coronary Artery to Bradykinin: Role of Arachidonic Acid, 976

Arginine
Long-term Administration of L-Arginine Improves Nitric Oxide Release From Kidney in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 752
Long-term Cardiovascular Role of Nitric Oxide in Conscious Rats, 185
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121

Argipressin
Inhibition of Vasopressin Action in Vascular Smooth Muscle by the V_1 Antagonist OPC-21268, 217
Arterial occlusive diseases
Renal Atrophy and Arterial Stenosis: A Prospective Study With Duplex Ultrasound, 346
Arteries (See also individual arteries)
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Relaxation of Porcine Coronary Artery to Bradykinin: Role of Arachidonic Acid, 976
Stimulation of Vascular Glycosaminoglycan Synthesis by Subpressor Angiotensin II in Rats, I-148
Arterioles
Active and Passive Arteriolar Regulation in Spontaneously Hypertensive Rats, 757
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Removal of Endothelium-Dependent Relaxation by Antibody and Complement in Afferent Arterioles, I-54
Renal Arteriolar Angiotensin Responses During Varied Adenosine Receptor Activation, I-114
Arteriosclerosis
Periventricular White Matter Lucency and Cerebral Blood Flow Autoregulation in Hypertensive Patients, 565
Atherosclerosis
Cardiac and Arterial Hypertrophy and Atherosclerosis in Hypertension, 802
Atrial natriuretic factor
Effects of Atrial Natriuretic Factor on Cyclic Nucleotides in Rabbit Proximal Tubule, 358
High-Fructose Feeding Elicits Insulin Resistance, Hyperinsulinism, and Hypertension in Normal Mongrel Dogs, 456
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141
Salt-Regulating Hormones in Young Normotensive Obese Subjects: Effects of Saline Load, I-20
Atrial natriuretic peptides (See also Natriuretic peptides)
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903
Calcium Dependency of Frequency-Stimulated Atrial Natriuretic Peptide Secretion, 710
Modulation of Exogenous and Endogenous Atrial Natriuretic Peptide by a Receptor Inhibitor, 613
Autonomic nervous system
Effects of Age and Hypertension on Autonomic Nervous Regulation During Passive Head-Up Tilt, I-82
Physical Training and Baroreceptor Control of Sympathetic Nerve Activity in Humans, 294
Autonomic nervous system diseases
Baroreflex Failure in a Patient with Central Nervous System Lesions Involving the Nucleus Tractus Solitarii, 491
Autoradiography
In Vivo Occupancy of Angiotensin II Subtype 1 Receptors in Rat Renal Medullary Interstitial Cells, 838
AV3V lesion
Anteroventral Third Ventricle Lesions Abolish Lumbar Sympathetic Responses to Insulin, 1059

B

Barium
Increased Barium Influx and Potassium Current in Stroke-Prone Spontaneously Hypertensive Rats, 1091
Bendroflumethiazide
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040
Blacks
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179
Blood flow velocity
Hemodynamic Effects Elicited by Stimulation of the Nucleus Tractus Solitarii, I-73
Periventricular White Matter Lucency and Cerebral Blood Flow Autoregulation in Hypertensive Patients, 565
Quantification of Retinal Capillary Density and Flow Velocity in Patients With Essential Hypertension, 464
Blood platelets
Blood Pressure Inversely Correlates With Thrombin-Evoked Calcium Rise in Platelets, 703
Platelet Calcium Transport in Hypertension, 31
Blood pressure
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992
A Kallikrein-Like Enzyme in the Aorta of Normotensive and Hypertensive Rats, 899
Abnormal Pressure Natriuresis in the Dog Model of Obesity-Induced Hypertension, I-8
Alteration of Response to Neuropeptide Y in the Nucleus Tractus Solitarius of Spontaneously Hypertensive Rats, I-93
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193
Blood Pressure–Lowering Effect of an Orally Active Vasopressin V1 Receptor Antagonist in Mineralocorticoid Hypertension in the Rat, 737
Body Mass Index and Associations of Sodium and Potassium With Blood Pressure in INTERSALT, 729
Chronic Blood Pressure Effects of Bufalin, a Sodium-Potassium ATPase Inhibitor, in Rats, I-106
Chronic Central Versus Peripheral Ouabain, Blood Pressure, and Sympathetic Activity in Rats, 1087
Chronic Inhibition of Bradykinin B_2-Receptors Enhances the Slow Vasopressor Response to Angiotensin II, 646
Consistency of Ethnic Differences in Children's Pressor Reactivity: 1987 to 1992, I-152
Correlates of Blood Pressure in Community-Dwelling Older Adults: The Cardiovascular Health Study, 59
Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036
Dose-Dependent Effects of Perindopril on Blood Pressure and Small-Artery Structure, 659
Effects of Fludrocortisone on Sympathetic Nerve Activity in Humans, 123
Endothelin Blockade Lowers Total Peripheral Resistance in Hemorrhagic Shock Recovery, 205
Evidence Against a Role of Insulin in Hypertension in Spontaneously Hypertensive Rats: CS-045 Does Not Lower Blood Pressure Despite Improvement of Insulin Resistance, 1071
Factors Affecting Ambulatory Blood Pressure Reproducibility: Results of the HARVEST Trial, 211
Furosemide Elicits Nonuniform Reflex Responses Via Cardiac Sympathetic Afferents, 924
Hemodynamic Effects Elicited by Stimulation of the Nucleus Tractus Solitarii, I-73
Hypertension Induced by Nitric Oxide Synthesis Inhibition Is Renal Nerve Dependent, 971
Left Ventricular Mass and Cardiovascular Reactivity in Young Men, I-168
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Nitric Oxide Influences Blood Flow Distribution in Renovascular Hypertension, I-34
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121
Perindopril Changes the Mesenteric Pressure Profile of Conscious Hypertensive and Normotensive Rats, 325
Physiopathogenesis of Acute Aortic Coarctation Hypertension in Conscious Rats, I-78
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Pressure Range for Release of Renomedullary Depressor Substance in Rabbits, 639
Relation of Pulse Pressure and Blood Pressure Reduction to the Incidence of Myocardial Infarction, 395

Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49
Rostral Ventrolateral Medulla as a Site for the Central Hypertensive Action of Kinins, 52
Short-term Variability of Blood Pressure and Heart Rate in Borderline and Mildly Hypertensive Subjects, 18
Systemic Hemodynamics During Sleep in Young or Middle-aged and Elderly Patients With Essential Hypertension, 167
Time Course of Changes in Sigmoidal-Fitting Baroreceptor Curves in One-Kidney, One Clip Hypertensive Rats, I-87
Timing for Administration of an Antihypertensive Drug in the Treatment of Essential Hypertension, I-211
Twenty-four–Hour Blood Pressure and Heart Rate Profiles in Humans: A Twin Study, 244
Vascular Kallikrein in Deoxycorticosterone Acetate–Salt Hypertensive Rats, I-185
Vascular Responsiveness to Nitric Oxide Synthesis Inhibition in Hypertensive Rats, 744

Blood pressure determination
Factors Affecting Ambulatory Blood Pressure Reproducibility: Results of the HARVEST Trial, 211
Potential Problems With the Random-Zero Sphygmomanometer, 254
Twenty-four–Hour Blood Pressure and Heart Rate Profiles in Humans: A Twin Study, 244

Blood pressure monitors
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992
Blood Pressure Inversely Correlates With Thrombin-Evoked Calcium Rise in Platelets, 703
Factors Affecting Ambulatory Blood Pressure Reproducibility: Results of the HARVEST Trial, 211
Potential Problems With the Random-Zero Sphygmomanometer, 254

Blood vessels
Effects of a β-Blocker or a Converting Enzyme Inhibitor on Resistance Arteries in Essential Hypertension, 83
Insulin Attenuates Agonist-Evoked Calcium Transients in Vascular Smooth Muscle Cells, I-25

Body mass index
Body Mass Index and Associations of Sodium and Potassium With Blood Pressure in INTERSALT, 729

Body weight
Abnormal Pressure Natriuresis in the Dog Model of Obesity-Induced Hypertension, I-8

Bradycardia
DuP 753 Is More Effective Than Captopril on Baroreceptor Function in High-Renin Hypertension, I-64

Bradykinin
A Kallikrein-Like Enzyme in the Aorta of Normotensive and Hypertensive Rats, 899
Angiotensin-Converting Enzyme Inhibition and the Heart, 813
Angiotensin-Converting Enzyme Inhibition Improves Cardiac Function: Role of Bradykinin, 411
Chronic Inhibition of Bradykinin B_2-Receptors Enhances the Slow Vasopressor Response to Angiotensin II, 646
Effects of Converting Enzyme Inhibitors on Angiotensin and Bradykinin Peptides, 439
Oxytocic Effect of Trypsin on the Isolated Rat Uterus, I-250
Rat Renal Interstitial Bradykinin, Prostaglandin E_2, and Cyclic Guanosine 3′,5′-Monophosphate: Effects of Altered Sodium Intake, 1068
Relaxation of Porcine Coronary Artery to Bradykinin: Role of Arachidonic Acid, 976

Brain
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121
Regulation of Angiotensin II Receptors in Rat Brain During Dietary Sodium Changes, I-137
Salt-Induced Hypertension in Normotensive Spontaneously Hypertensive Rats, 791

Brain tissue transplantation
Hypertension Induced by Brain Grafts From Fetal Spontaneously Hypertensive Rats, 765

Bretylium compounds
Nitrosyl Factors Mediate Active Neurogenic Hindquarter Vasodilation in the Conscious Rat, 962

Bufanolides
Chronic Blood Pressure Effects of Bufalin, a Sodium-Potassium ATPase Inhibitor, in Rats, I-106

C

Ca^{2+}-transporting ATPase
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513
Insulin-Induced Ca^{2+} Transport Is Altered in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, 931

Calcitriol
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513

Calcium
Blood Pressure Inversely Correlates With Thrombin-Evoked Calcium Rise in Platelets, 703
Calcium Dependency of Frequency-Stimulated Atrial Natriuretic Peptide Secretion, 710
Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036
Effects of Sarcoplasmic Reticulum Calcium Pump Inhibitors on Vascular Smooth Muscle, I-156
Hypocalcemia and Pregnancy-Induced Hypertension Produced by Low-Calcium Diet, 695
Inhibition of Vasopressin Action in Vascular Smooth Muscle by the V_1 Antagonist OPC-21268, 217
Insulin Attenuates Agonist-Evoked Calcium Transients in Vascular Smooth Muscle Cells, I-25
Insulin-Induced Ca^{2+} Transport Is Altered in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, 931
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97
Nitric Oxide Participates in Calcium-Mediated Regulation of Renin Release, I-40
Platelet Calcium Transport in Hypertension, 31
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141

Calcium channel blockers
Felodipine Therapy May Not Alter Glucose and Lipid Metabolism in Hypertensives, I-215
Systemic and Renal Effects of Nifedipine in Cyclosporine-Associated Hypertension, I-220

Calcium channels
Calcium Dependency of Frequency-Stimulated Atrial Natriuretic Peptide Secretion, 710

National High Blood Pressure Education Program Working Group Report on Hypertension in Diabetes, 145
Nitric Oxide Influences Blood Flow Distribution in Renovascular Hypertension, I-34
Nitric Oxide Regulates Renal Hemodynamics and Urinary Sodium Excretion in Dogs, 619
Remission of High Blood Pressure Reverses Arterial Potassium Channel Alterations, 941
Renal Atrophy and Arterial Stenosis: A Prospective Study With Duplex Ultrasound, 346
Stimulation of Vascular Glycosaminoglycan Synthesis by Subpressor Angiotensin II in Rats, I-148
The National High Blood Pressure Education Program Working Group Report on Hypertension in Diabetes, 159
Time Course of Changes in Sigmoidal-Fitting Baroreceptor Curves in One-Kidney, One Clip Hypertensive Rats, I-87

Hypertension, sodium-dependent
Antihypertensive Effect of Interleukin-2 in Salt-Sensitive Dahl Rats, 68
Genetic Contamination of Dahl SS/Jr Rats: Impact on Studies of Salt-Sensitive Hypertension, 786
Increased Cytosolic Sodium and Reduced Na,K-ATPase Activity in Transgenic Rats, I-198
Insulin Levels Are Similar in Obese Salt-Sensitive and Salt-Resistant Hypertensive Subjects, I-1
Microalbuminuria in Salt-Sensitive Patients: A Marker for Renal and Cardiovascular Risk Factors, 195
Salt-Induced Hypertension in Normotensive Spontaneously Hypertensive Rats, 791
Salt-Regulating Hormones in Young Normotensive Obese Subjects: Effects of Saline Load, I-20
Salt Sensitivity in Hypertension: Renal and Cardiovascular Implications, 531

Hypertension, spontaneous
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223

Hypertension, systolic
National High Blood Pressure Education Program Working Group Report on Hypertension in the Elderly, 275

Hypertension, white coat
Renal Sodium Handling in Patients With Untreated Hypertension and White Coat Hypertension, 496

Hypertrophy
Angiotensin Converting Enzyme Inhibition Prevents the Increase in Aortic Collagen in Rats, 74
Cardiac and Arterial Hypertrophy and Atherosclerosis in Hypertension, 802
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419
Effects of a β-Blocker or a Converting Enzyme Inhibitor on Resistance Arteries in Essential Hypertension, 83
Effects of Chlorthalidone on Ventricular Hypertrophy in Deoxycorticosterone Acetate–Salt Hypertensive Rats, I-180
Left Ventricular Mass and Cardiovascular Reactivity in Young Men, I-168
Long-term Nitric Oxide Synthase Inhibition and Distensibility of Carotid Artery in Intact Rats, 967
Myocardial Scintigraphic Characteristics in Patients With Primary Aldosteronism, I-164
Participation of Ouabainlike Compound in Reduced Renal Mass–Saline Hypertension, I-110
Relation of Obesity and Gender to Left Ventricular Hypertrophy in Normotensive and Hypertensive Adults, 600
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vascular Smooth Muscle Cell Hypertrophy, I-142
Structural Remodeling in Hypertensive Heart Disease and the Role of Hormones, 869
Tissue Angiotensin Converting Enzyme in Cardiac and Vascular Hypertrophy, Repair, and Remodeling, 258

Hypertrophy, vascular (See Hypertrophy)

Hypocalcemia
Hypocalcemia and Pregnancy-Induced Hypertension Produced by Low-Calcium Diet, 695

Hypotension
Endothelin Blockade Lowers Total Peripheral Resistance in Hemorrhagic Shock Recovery, 205
Human Tissue Kallikrein Induces Hypotension in Transgenic Mice, 236
OPC-21268, a Vasopressin V_1 Antagonist, Produces Hypotension in Spontaneously Hypertensive Rats, 200
Pressure Range for Release of Renomedullary Depressor Substance in Rabbits, 639

Hypothalamus
Hypertension Induced by Brain Grafts From Fetal Spontaneously Hypertensive Rats, 765

I

Ibotenic acid
Effects of Lateral Parabrachial Nucleus Lesions in Chronic Renal Hypertensive Rats, 774

Image processing, computer-assisted
Three-dimensional Echocardiography: Advances for Measurement of Ventricular Volume and Mass, I-172

Immunoglobulin fragments
Chronic Central Versus Peripheral Ouabain, Blood Pressure, and Sympathetic Activity in Rats, 1087

Immunohistochemistry
Intraglomerular Expression of α-Smooth Muscle Actin in Aging Mice, 889

In situ hybridization
Distribution of Type 1 Angiotensin II Receptor Subtype Messenger RNAs in the Rat Fetus, 137
Endothelin-1–Selective Receptor in the Arterial Intima of Patients With Hypertension, 288

Indomethacin
Furosemide Elicits Nonuniform Reflex Responses Via Cardiac Sympathetic Afferents, 924

Induced macrophages
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121

Inositol 1,4,5-trisphosphate
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402

Insomnia
Diurnal Blood Pressure Variation and Hormonal Correlates in Fatal Familial Insomnia, 569

Insulin
Anteroventral Third Ventricle Lesions Abolish Lumbar Sympathetic Responses to Insulin, 1059
Chronic Hyperinsulinemia Augments Deoxycorticosterone Acetate–Salt Hypertension, I-16
Chronic Insulin Administration Elevates Blood Pressure in Rats, 1012

Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036
Effect of Administration of Insulin on Streptozotocin-Induced Diabetic Hypertension in Rat, 1046
Glucose and Insulin Levels During Diuretic Therapy in Hypertensive Men, 688
High-Fructose Feeding Elicits Insulin Resistance, Hyperinsulinism, and Hypertension in Normal Mongrel Dogs, 456
Human Insulin–Mediated Enhancement of Vascular β-Adrenergic Responsiveness, 551
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054
Insulin Levels Are Similar in Obese Salt-Sensitive and Salt-Resistant Hypertensive Subjects, I-1
Kinins Contribute to the Improvement of Insulin Sensitivity During Treatment With Angiotensin Converting Enzyme Inhibitor, 450
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381

Insulin-like growth factor I
Increased Expression of Growth Hormone Receptor mRNA and Insulin-like Growth Factor-I mRNA in Volume-Overloaded Hearts, 884

Insulin resistance
Elevated Serum Insulin Levels in Patients With Essential Hypertension and Microalbuminuria, 681
Evidence Against a Role of Insulin in Hypertension in Spontaneously Hypertensive Rats: CS-045 Does Not Lower Blood Pressure Despite Improvement of Insulin Resistance, 1071
Impaired Insulin Sensitivity and Maximal Responsiveness in Older Hypertensive Men, 320
Insulin and Renal Sodium Retention in Hypertension-Prone Men, 313
Insulin Attenuates Agonist-Evoked Calcium Transients in Vascular Smooth Muscle Cells, I-25
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054
Insulin Sensitivity and the Effects of Insulin on Renal Sodium Handling and Pressor Systems in Essential Hypertensive Patients, I-29
Nitrendipine Improves Glucose Tolerance and Deoxyglucose Uptake in Hypertensive Rats, 1051
Role of Glucose Intolerance in Cardiac Diastolic Function in Essential Hypertension, 1002
Vanadyl Sulfate Prevents Fructose-Induced Hyperinsulinemia and Hypertension in Rats, 308
Vasoconstriction With Norepinephrine Causes Less Forearm Insulin Resistance Than a Reflex Sympathetic Vasoconstriction, 1006

Interferons
Expression of Nitric Oxide Synthase by Cytokines in Vascular Smooth Muscle Cells, I-45

Interleukins
Angiotensinogen: An Acute-Phase Protein? I-126
Antihypertensive Effect of Interleukin-2 in Salt-Sensitive Dahl Rats, 68

Ion channels
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141
Remission of High Blood Pressure Reverses Arterial Potassium Channel Alterations, 941

Ion exchange
Increased Activity of the Mg^{2+}/Na^{+} Exchanger in Red Blood Cells From Essential Hypertensive Patients, 987
Regulation of Intracellular pH in the Spontaneously Hypertensive Rat: Role of Bicarbonate-Dependent Transporters, 503

Ion transport
Regulation of Intracellular pH in the Spontaneously Hypertensive Rat: Role of Bicarbonate-Dependent Transporters, 503

Ions
Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036

Ischemia
Renal Artery Stenosis and Ischemia: Effect on Renal Blood Flow and Extraction Fraction, 96

Isoproterenol
Nitric Oxide Participates in Calcium-Mediated Regulation of Renin Release, I-40
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49

K

Kallikrein
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193
Cardiovascular Effects of Brain Kinin Receptor Blockade in Spontaneously Hypertensive Rats, I-189
Chronic Inhibition of Bradykinin B_2-Receptors Enhances the Slow Vasopressor Response to Angiotensin II, 646
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419
Human Tissue Kallikrein Induces Hypotension in Transgenic Mice, 236
Vascular Kallikrein in Deoxycorticosterone Acetate–Salt Hypertensive Rats, I-185

Kallikrein-kinin system
A Local Kallikrein-Kinin System Is Present in Rat Hearts, 919
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193
Kinins Contribute to the Improvement of Insulin Sensitivity During Treatment With Angiotensin Converting Enzyme Inhibitor, 450
Ontogeny of Somatic Angiotensin-Converting Enzyme, 369
Rostral Ventrolateral Medulla as a Site for the Central Hypertensive Action of Kinins, 52

Kidney
Blunted Natriuretic Response to a High-Sodium Meal in Obese Dogs: Role of Renal Nerves, 997
Effects of Atrial Natriuretic Factor on Cyclic Nucleotides in Rabbit Proximal Tubule, 358
Effects of Lateral Parabrachial Nucleus Lesions in Chronic Renal Hypertensive Rats, 774
In Vivo Occupancy of Angiotensin II Subtype 1 Receptors in Rat Renal Medullary Interstitial Cells, 838
Long-term Administration of L-Arginine Improves Nitric Oxide Release From Kidney in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 752
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: II. Renal G Proteins in Male and Female Rats, 653
Rat Renal Interstitial Bradykinin, Prostaglandin E_2, and Cyclic Guanosine 3′,5′-Monophosphate: Effects of Altered Sodium Intake, 1068
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Renal Medullary Captopril Delivery Lowers Blood Pressure in Spontaneously Hypertensive Rats, 337
Renal Sensory Receptor Activation by Calcitonin Gene–Related Peptide, 1063
Renal Sodium Handling in Patients With Untreated Hypertension and White Coat Hypertension, 496
Salt-Induced Hypertension in Normotensive Spontaneously Hypertensive Rats, 791

Kidney failure
Dopaminergic Abnormalities in Hypertension Associated With Moderate Renal Insufficiency, I-240
Pressor Mechanisms in Adriamycin-Induced Nephropathy With Hypertension in Rats, I-246

Kidney medulla
Pressure Range for Release of Renomedullary Depressor Substance in Rabbits, 639
Renal Medullary Captopril Delivery Lowers Blood Pressure in Spontaneously Hypertensive Rats, 337

Kidney tubules, proximal
Effects of Atrial Natriuretic Factor on Cyclic Nucleotides in Rabbit Proximal Tubule, 358

Kininase II
Effects of a Metalloendopeptidase-24.15 Inhibitor on Renal Hemodynamics and Function in Rats, I-235
Ontogeny of Somatic Angiotensin-Converting Enzyme, 369
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865
Salt-Induced Hypertension in Normotensive Spontaneously Hypertensive Rats, 791
Structural Remodeling in Hypertensive Heart Disease and the Role of Hormones, 869
Tissue Angiotensin Converting Enzyme in Cardiac and Vascular Hypertrophy, Repair, and Remodeling, 258
Vascular Renin in the Guinea Pig: Suppression by the Renin Inhibitor Remikiren, 861
Kininogens
A Local Kallikrein-Kinin System Is Present in Rat Hearts, 919
Kinins
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193
Cardiovascular Effects of Brain Kinin Receptor Blockade in Spontaneously Hypertensive Rats, I-189
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865

L

Lanthanum
Increased Barium Influx and Potassium Current in Stroke-Prone Spontaneously Hypertensive Rats, 1091
Laser-Doppler flowmetry
Endothelin Receptor Antagonists Inhibit Endothelin in Human Skin Microcirculation, 581
Letters to the Editor
Dissociation of Blood Pressure Level and Reactivity, 676
Inverse Association Between Baseline Pressure and Benefit From Treatment in Isolated Systolic Hypertension, 269
Postexercise Hypotension, 677
Stimulation of the Kallikrein-Kinin System by Pregnancy May Help Restore Renal Vasodilator Response to Glycine in Dahl Salt-Sensitive Rats, 810
Lidocaine
Endothelin Receptor Antagonists Inhibit Endothelin in Human Skin Microcirculation, 581
Lipid metabolism
Felodipine Therapy May Not Alter Glucose and Lipid Metabolism in Hypertensives, I-215
Lipopolysaccharides
Angiotensinogen: An Acute-Phase Protein? I-126
Lipoproteins
Elevated Serum Insulin Levels in Patients With Essential Hypertension and Microalbuminuria, 681
Microalbuminuria in Salt-Sensitive Patients: A Marker for Renal and Cardiovascular Risk Factors, 195
Oxidized Lipoproteins Inhibit Endothelium-Dependent Vasodilation: Effects of Pressure and High-Density Lipoprotein, 556
Lipoxygenase
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vascular Smooth Muscle Cell Hypertrophy, I-142
Lithium
Hyperinsulinemia in Normotensive Offspring of Hypertensive Parents, I-12
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054
Renal Sodium Handling in Patients With Untreated Hypertension and White Coat Hypertension, 496
Liver
Angiotensinogen: An Acute-Phase Protein? I-126
Losartan
Chronic Converting Enzyme Inhibition Facilitates Baroreceptor Resetting to Hypertensive Levels, I-68
DuP 753 Is More Effective Than Captopril on Baroreceptor Function in High-Renin Hypertension, I-64
Effects of Angiotensin Receptor Subtype Inhibitors on Plasma Angiotensin Clearance, 853
In Vivo Occupancy of Angiotensin II Subtype 1 Receptors in Rat Renal Medullary Interstitial Cells, 838
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Lumbosacral region
Anteroventral Third Ventricle Lesions Abolish Lumbar Sympathetic Responses to Insulin, 1059
Lymphocytes
Increased Cytosolic Sodium and Reduced Na,K-ATPase Activity in Transgenic Rats, I-198

M

Magnesium
Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036
Dose-Related Effects of Magnesium on Myocardial Function in the Neonate, 174
Increased Activity of the Mg^{2+}/Na^{+} Exchanger in Red Blood Cells From Essential Hypertensive Patients, 987
Mast cells
Vasoconstrictor Action of Angiotensin I–Convertase and the Synthetic Substrate (Pro^{11},D-Ala^{12})-Angiotensin I, 857
Mechanoreceptors
Renal Sensory Receptor Activation by Calcitonin Gene–Related Peptide, 1063
Medullipin (See Kidney medulla)
Membrane metalloendopeptidase
Effects of a Metalloendopeptidase-24.15 Inhibitor on Renal Hemodynamics and Function in Rats, I-235
Mesenteric arteries
Hypertension Induced by Brain Grafts From Fetal Spontaneously Hypertensive Rats, 765
Metabolism
Energetics of Crossbridge Phosphorylation and Contraction in Vascular Smooth Muscle, 1106
Methylene blue
Blockers of the L-Arginine–Nitric Oxide–Cyclic GMP Pathway Facilitate Baroreceptor Resetting, I-60
Mice, transgenic
Human Tissue Kallikrein Induces Hypotension in Transgenic Mice, 236
Microcirculation
Endothelin Receptor Antagonists Inhibit Endothelin in Human Skin Microcirculation, 581
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Quantification of Retinal Capillary Density and Flow Velocity in Patients With Essential Hypertension, 464
Microscopy
Platelet-Derived Growth Factor and Angiotensin II Induce Different Spatial Distribution of Protein Kinase C-α and -β in Vascular Smooth Muscle Cells, 848
Mineralocorticoids
A Kallikrein-Like Enzyme in the Aorta of Normotensive and Hypertensive Rats, 899
Blood Pressure–Lowering Effect of an Orally Active Vasopressin V1 Receptor Antagonist in Mineralocorticoid Hypertension in the Rat, 737
Chronic Inhibition of Bradykinin B_2-Receptors Enhances the Slow Vasopressor Response to Angiotensin II, 646
Mortality
Regional Differences in Mortality During 15-Year Follow-up of 11 936 Hypertensive Veterans, 431
Muscle contraction
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Muscle, smooth, vascular
A Photoactivable Source of Relaxing Factor in Genetic Hypertension, 894
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903

C-Type Natriuretic Peptide Upregulates Vascular Endothelin Type B Receptors, 936
Cell Growth and Na-K-Cl Cotransport Responses of Vascular Smooth Muscle Cells of Milan Rats, 1022
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513
Effects of Sarcoplasmic Reticulum Calcium Pump Inhibitors on Vascular Smooth Muscle, I-156
Endothelin-1–Selective Receptor in the Arterial Intima of Patients With Hypertension, 288
Energetics of Crossbridge Phosphorylation and Contraction in Vascular Smooth Muscle, 1106
Enhanced Vascular Reactivity to Mastoparan, a G Protein Activator, in Genetically Hypertensive Rats, 946
Expression of Nitric Oxide Synthase by Cytokines in Vascular Smooth Muscle Cells, I-45
Glucocorticoid Increases Angiotensin II Type 1 Receptor and Its Gene Expression, 25
Guanine Nucleotide–Binding Proteins in Aortic Smooth Muscle From Hypertensive Rats, 914
Human Insulin–Mediated Enhancement of Vascular β-Adrenergic Responsiveness, 551
Increased Barium Influx and Potassium Current in Stroke-Prone Spontaneously Hypertensive Rats, 1091
Inhibition of Vasopressin Action in Vascular Smooth Muscle by the V_1 Antagonist OPC-21268, 217
Insulin Attenuates Agonist-Evoked Calcium Transients in Vascular Smooth Muscle Cells, I-25
New Perspectives in Hypertension Research: Potentials of Vascular Biology, 1132
Parathyroid Hormone/Adenylate Cyclase Coupling in Vascular Smooth Muscle Cells, 468
Platelet-Derived Growth Factor and Angiotensin II Induce Different Spatial Distribution of Protein Kinase C-α and -β in Vascular Smooth Muscle Cells, 848
Regulation of Natriuretic Peptide Receptor A and B Expression by Transforming Growth Factor-β_1 in Cultured Aortic Smooth Muscle Cells, 908
Remission of High Blood Pressure Reverses Arterial Potassium Channel Alterations, 941
Role of the Lipoxygenase Pathway in Angiotensin II–Induced Vascular Smooth Muscle Cell Hypertrophy, I-142
Stimulation of Vascular Glycosaminoglycan Synthesis by Subpressor Angiotensin II in Rats, I-148
Transduction Mechanisms Involved in the Regulation of Myogenic Activity, 1096
Transforming Growth Factor-β1 Gene Activation and Growth of Smooth Muscle From Hypertensive Rats, 593
Vascular Responsiveness to Nitric Oxide Synthesis Inhibition in Hypertensive Rats, 744

Myocardial infarction
Atrial and Brain Natriuretic Peptides in Cardiovascular Diseases, I-231
Relation of Pulse Pressure and Blood Pressure Reduction to the Incidence of Myocardial Infarction, 395

N

Na-K-Cl cotransport
Cell Growth and Na-K-Cl Cotransport Responses of Vascular Smooth Muscle Cells of Milan Rats, 1022

Na^+-K^+-transporting ATPase
Chronic Blood Pressure Effects of Bufalin, a Sodium-Potassium ATPase Inhibitor, in Rats, I-106
Increased Cytosolic Sodium and Reduced Na,K-ATPase Activity in Transgenic Rats, I-198

Natriuresis
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040
Blunted Natriuretic Response to a High-Sodium Meal in Obese Dogs: Role of Renal Nerves, 997
Decreased Sensitivity to Renal Interstitial Hydrostatic Pressure in Dahl Salt-Sensitive Rats, 1082
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513
Hypertension Induced by Nitric Oxide Synthesis Inhibition Is Renal Nerve Dependent, 971
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Renal Effects of Captopril and Nitrendipine in Transgenic Rats With an Extra Renin Gene, 626
Role of Brain Ouabainlike Compound in Central Nervous System–Mediated Natriuresis in Rats, 1027
Salt Sensitivity in Hypertension: Renal and Cardiovascular Implications, 531

Natriuretic peptides
Atrial and Brain Natriuretic Peptides in Cardiovascular Diseases, I-231
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054

Natriuretic peptides, C-type (See Natriuretic peptides)

Nephrectomy
Modulation of Renin-Angiotensin and Kallikrein Gene Expression in Experimental Hypertension, I-131

Nephrosclerosis
Accelerated Decline in Renal Perfusion With Aging in Essential Hypertension, 351

Neuropeptide Y
Alteration of Response to Neuropeptide Y in the Nucleus Tractus Solitarius of Spontaneously Hypertensive Rats, I-93

Neuroregulators
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38

Nifedipine
Intraglomerular Expression of α-Smooth Muscle Actin in Aging Mice, 889
Systemic and Renal Effects of Nifedipine in Cyclosporine-Associated Hypertension, I-220

Nitrendipine
Combination Treatment of Enalapril With Nitrendipine in Rats With Renovascular Hypertension, 114
Nitrendipine Improves Glucose Tolerance and Deoxyglucose Uptake in Hypertensive Rats, 1051
Renal Effects of Captopril and Nitrendipine in Transgenic Rats With an Extra Renin Gene, 626
Timing for Administration of an Antihypertensive Drug in the Treatment of Essential Hypertension, I-211

Nitrergic nerves
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121

Nitric oxide
A Photoactivable Source of Relaxing Factor in Genetic Hypertension, 894
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040
Blockers of the L-Arginine–Nitric Oxide–Cyclic GMP Pathway Facilitate Baroreceptor Resetting, I-60
Cyclosporine Produces Endothelial Dysfunction by Increased Production of Superoxide, 957
Effect of Potassium on Vasodilation to Acetylcholine in Essential Hypertension, 485
Expression of Nitric Oxide Synthase by Cytokines in Vascular Smooth Muscle Cells, I-45
Hypertension Induced by Nitric Oxide Synthesis Inhibition Is Renal Nerve Dependent, 971
Long-term Administration of L-Arginine Improves Nitric Oxide Release From Kidney in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 752
Long-term Nitric Oxide Synthase Inhibition and Distensibility of Carotid Artery in Intact Rats, 967
Mechanisms Involved in the Cardiovascular-Renal Actions of Nitric Oxide Inhibition, 951
Nitric Oxide Influences Blood Flow Distribution in Renovascular Hypertension, I-34

Nitric Oxide Participates in Calcium-Mediated Regulation of Renin Release, I-40
Nitric Oxide Regulates Renal Hemodynamics and Urinary Sodium Excretion in Dogs, 619
Nitrosyl Factors Mediate Active Neurogenic Hindquarter Vasodilation in the Conscious Rat, 962
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141
Role of Kinins and Nitric Oxide in the Antihypertrophic Effect of Ramipril, 865
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49
Role of Superoxide Anions in the Mediation of Endothelium-Dependent Contractions, 229
Sympathetic Baroreceptor Responses After Chronic N^G-Nitro-L-Arginine Methyl Ester Treatment in Conscious Rats, 982
Vascular Responsiveness to Nitric Oxide Synthesis Inhibition in Hypertensive Rats, 744
Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Nitro compounds
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040
Blockers of the L-Arginine–Nitric Oxide–Cyclic GMP Pathway Facilitate Baroreceptor Resetting, I-60
Nitrosyl Factors Mediate Active Neurogenic Hindquarter Vasodilation in the Conscious Rat, 962
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49

Nitroglycerin
Smooth Muscle Cell Responsiveness to Nitrovasodilators in Hypertensive and Normotensive Rats, 476

Nitroprusside
Effect of Potassium on Vasodilation to Acetylcholine in Essential Hypertension, 485
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49
Smooth Muscle Cell Responsiveness to Nitrovasodilators in Hypertensive and Normotensive Rats, 476

Norepinephrine
Diurnal Blood Pressure Variation and Hormonal Correlates in Fatal Familial Insomnia, 569
Endothelin Receptor Antagonists Inhibit Endothelin in Human Skin Microcirculation, 581
Gene Expression of 11β-Hydroxysteroid Dehydrogenase in the Mesenteric Arteries of Genetically Hypertensive Rats, 577
Neurogenic Component of Ouabain-Evoked Contractions Is Modulated by the Endothelium, 10
Physiopathogenesis of Acute Aortic Coarctation Hypertension in Conscious Rats, I-78
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Salt Sensitivity in Hypertension: Renal and Cardiovascular Implications, 531
Vasoconstriction With Norepinephrine Causes Less Forearm Insulin Resistance Than a Reflex Sympathetic Vasoconstriction, 1006

Nucleotides, cyclic
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38
Effects of Atrial Natriuretic Factor on Cyclic Nucleotides in Rabbit Proximal Tubule, 358
Role of Superoxide Anions in the Mediation of Endothelium-Dependent Contractions, 229

O

Obesity
Blunted Natriuretic Response to a High-Sodium Meal in Obese Dogs: Role of Renal Nerves, 997
Insulin Levels Are Similar in Obese Salt-Sensitive and Salt-Resistant Hypertensive Subjects, I-1
Relation of Obesity and Gender to Left Ventricular Hypertrophy in Normotensive and Hypertensive Adults, 600
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Salt-Regulating Hormones in Young Normotensive Obese Subjects: Effects of Saline Load, I-20

OPC-21268
Blood Pressure–Lowering Effect of an Orally Active Vasopressin V1 Receptor Antagonist in Mineralocorticoid Hypertension in the Rat, 737

Ouabain
Chronic Blood Pressure Effects of Bufalin, a Sodium-Potassium ATPase Inhibitor, in Rats, I-106
Chronic Central Versus Peripheral Ouabain, Blood Pressure, and Sympathetic Activity in Rats, 1087
Does Plasma Immunoreactive Ouabain Originate From the Adrenal Gland? I-102
Is Ouabain an Authentic Endogenous Mammalian Substance Derived From the Adrenal? 632
Neurogenic Component of Ouabain-Evoked Contractions Is Modulated by the Endothelium, 10
Participation of Ouabainlike Compound in Reduced Renal Mass–Saline Hypertension, I-110
Role of Brain Ouabainlike Compound in Central Nervous System–Mediated Natriuresis in Rats, 1027

Oxytocin
Oxytocic Effect of Trypsin on the Isolated Rat Uterus, I-250

P

Parathyroid hormones
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402
Parathyroid Hormone/Adenylate Cyclase Coupling in Vascular Smooth Muscle Cells, 468

Paraventricular hypothalamic nucleus
Effects of Lateral Parabrachial Nucleus Lesions in Chronic Renal Hypertensive Rats, 774

Pepstatins
Oxytocic Effect of Trypsin on the Isolated Rat Uterus, I-250

Peptides
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903

Perfusion
Dietary Magnesium Prevents Fructose-Induced Insulin Insensitivity in Rats, 1036
Removal of Endothelium-Dependent Relaxation by Antibody and Complement in Afferent Arterioles, I-54

Phosphatases
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141

Phospholipase C
Enhanced Vascular Reactivity to Mastoparan, a G Protein Activator, in Genetically Hypertensive Rats, 946

Phosphorylation
Energetics of Crossbridge Phosphorylation and Contraction in Vascular Smooth Muscle, 1106
Pleiotropic Regulation of Vascular Smooth Muscle Tone by Cyclic GMP–Dependent Protein Kinase, 1141

Physical education and training
Physical Training and Baroreceptor Control of Sympathetic Nerve Activity in Humans, 294

Pituitary gland
Distribution of Type 1 Angiotensin II Receptor Subtype Messenger RNAs in the Rat Fetus, 137

Placenta
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193

Plasma volume
Effects of Fludrocortisone on Sympathetic Nerve Activity in Humans, 123

Platelet-derived growth factor
Cell Growth and Na-K-Cl Cotransport Responses of Vascular Smooth Muscle Cells of Milan Rats, 1022

Platelet-Derived Growth Factor and Angiotensin II Induce Different Spatial Distribution of Protein Kinase C-α and -β in Vascular Smooth Muscle Cells, 848

Postreceptor signaling systems
Glucocorticoid Increases Angiotensin II Type 1 Receptor and Its Gene Expression, 25

Posture
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179

Potassium
Body Mass Index and Associations of Sodium and Potassium With Blood Pressure in INTERSALT, 729
Effect of Potassium on Vasodilation to Acetylcholine in Essential Hypertension, 485
Increased Barium Influx and Potassium Current in Stroke-Prone Spontaneously Hypertensive Rats, 1091
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179

Potassium channels
Remission of High Blood Pressure Reverses Arterial Potassium Channel Alterations, 941

Preeclampsia
Glucose Intolerance as a Predictor of Hypertension in Pregnancy, 717

Pregnancy
Glucose Intolerance as a Predictor of Hypertension in Pregnancy, 717

Pressoreceptors
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992
Baroreflex Failure in a Patient with Central Nervous System Lesions Involving the Nucleus Tractus Solitarii, 491
Blockers of the L-Arginine–Nitric Oxide–Cyclic GMP Pathway Facilitate Baroreceptor Resetting, I-60
Cardiovascular Effects of Brain Kinin Receptor Blockade in Spontaneously Hypertensive Rats, I-189
Chronic Converting Enzyme Inhibition Facilitates Baroreceptor Resetting to Hypertensive Levels, I-68
DuP 753 Is More Effective Than Captopril on Baroreceptor Function in High-Renin Hypertension, I-64
Furosemide Elicits Nonuniform Reflex Responses Via Cardiac Sympathetic Afferents, 924
Physical Training and Baroreceptor Control of Sympathetic Nerve Activity in Humans, 294
Sympathetic Baroreceptor Responses After Chronic N^G-Nitro-L-Arginine Methyl Ester Treatment in Conscious Rats, 982
Time Course of Changes in Sigmoidal-Fitting Baroreceptor Curves in One-Kidney, One Clip Hypertensive Rats, I-87

Prognosis
Cardiac and Arterial Hypertrophy and Atherosclerosis in Hypertension, 802

Proliferation
Transforming Growth Factor-β1 Gene Activation and Growth of Smooth Muscle From Hypertensive Rats, 593

Promoter regions (genetics)
Epidermal Growth Factor–Enhanced Human Angiotensin II Type 1 Receptor, 1032

Prostaglandin-endoperoxide synthase
Role of Superoxide Anions in the Mediation of Endothelium-Dependent Contractions, 229

Protease inhibitors
Effects of a Metalloendopeptidase-24.15 Inhibitor on Renal Hemodynamics and Function in Rats, I-235

Protein kinase C
Altered Protein Kinase C Regulation of Phosphoinositide-Coupled Receptors in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 722
Endothelin Mobilizes Calcium and Enhances Glucose Uptake in Cultured Human Skeletal Myoblasts and L6 Myotubes, 1075
Insulin-Induced Ca^{2+} Transport Is Altered in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, 931
Platelet-Derived Growth Factor and Angiotensin II Induce Different Spatial Distribution of Protein Kinase C-α and -β in Vascular Smooth Muscle Cells, 848

Protein kinases
Inhibition of Vasopressin Action in Vascular Smooth Muscle by the V_1 Antagonist OPC-21268, 217

Protein-tyrosine kinase
Insulin-Induced Ca^{2+} Transport Is Altered in Vascular Smooth Muscle Cells of Spontaneously Hypertensive Rats, 931
Transforming Growth Factor-β1 Gene Activation and Growth of Smooth Muscle From Hypertensive Rats, 593

Proteoglycans
Stimulation of Vascular Glycosaminoglycan Synthesis by Subpressor Angiotensin II in Rats, I-148

Pulse
Relation of Pulse Pressure and Blood Pressure Reduction to the Incidence of Myocardial Infarction, 395

R

Rabbits
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49

Radioimmunoassay
Effects of Angiotensin Receptor Subtype Inhibitors on Plasma Angiotensin Clearance, 853
Effects of Converting Enzyme Inhibitors on Angiotensin and Bradykinin Peptides, 439
Is Ouabain an Authentic Endogenous Mammalian Substance Derived From the Adrenal? 632

Radionuclide imaging
Myocardial Scintigraphic Characteristics in Patients With Primary Aldosteronism, I-164

Ramipril
Angiotensin-Converting Enzyme Inhibition Improves Cardiac Function: Role of Bradykinin, 411

Rats
Guanine Nucleotide–Binding Proteins in Aortic Smooth Muscle From Hypertensive Rats, 914
Increased Expression of Growth Hormone Receptor mRNA and Insulin-like Growth Factor-I mRNA in Volume-Overloaded Hearts, 884
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97

Rats, inbred SHR
Alteration of Response to Neuropeptide Y in the Nucleus Tractus Solitarius of Spontaneously Hypertensive Rats, I-93
Angiotensin-Converting Enzyme Inhibition Improves Cardiac Function: Role of Bradykinin, 411
Angiotensin Converting Enzyme Inhibition Prevents the Increase in Aortic Collagen in Rats, 74
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903
Defective Modulation of Angiotensin II–Induced Renal Vasoconstriction in Hypertensive Rats, 329
Dose-Dependent Effects of Perindopril on Blood Pressure and Small-Artery Structure, 659
Enhanced Vascular Reactivity to Mastoparan, a G Protein Activator, in Genetically Hypertensive Rats, 946
Evidence Against a Role of Insulin in Hypertension in Spontaneously Hypertensive Rats: CS-045 Does Not Lower Blood Pressure Despite Improvement of Insulin Resistance, 1071
Hypertension in the Spontaneously Hypertensive Rat and the Sex Chromosomes, 161
Hypertension Induced by Brain Grafts From Fetal Spontaneously Hypertensive Rats, 765
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419
Inhibition of Angiotensin-Converting Enzyme Modulates the Autoregulation of Regional Cerebral Blood Flow in Hypertensive Rats, 781

Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: II. Renal G Proteins in Male and Female Rats, 653
OPC-21268, a Vasopressin V_1 Antagonist, Produces Hypotension in Spontaneously Hypertensive Rats, 200
Perindopril Changes the Mesenteric Pressure Profile of Conscious Hypertensive and Normotensive Rats, 325
Regulation of Intracellular pH in the Spontaneously Hypertensive Rat: Role of Bicarbonate-Dependent Transporters, 503
Renal Medullary Captopril Delivery Lowers Blood Pressure in Spontaneously Hypertensive Rats, 337
Sex Influence on Renal α_2-Adrenergic Receptor Density in the Spontaneously Hypertensive Rat, 607
Smooth Muscle Cell Responsiveness to Nitrovasodilators in Hypertensive and Normotensive Rats, 476
Transforming Growth Factor-β1 Gene Activation and Growth of Smooth Muscle From Hypertensive Rats, 593
Transgenes, Hypotheses, and Hypertension, 428
Unlike Human Hypertension, Blood Pressure in a Hereditary Hypertensive Rat Strain Shows No Linkage to the Angiotensinogen Locus, 797

Rats, inbred strains
Antihypertensive Effect of Interleukin-2 in Salt-Sensitive Dahl Rats, 68
Cell Growth and Na-K-Cl Cotransport Responses of Vascular Smooth Muscle Cells of Milan Rats, 1022
Decreased Sensitivity to Renal Interstitial Hydrostatic Pressure in Dahl Salt-Sensitive Rats, 1082
Gene Expression of 11β-Hydroxysteroid Dehydrogenase in the Mesenteric Arteries of Genetically Hypertensive Rats, 577
Genetic Contamination of Dahl SS/Jr Rats: Impact on Studies of Salt-Sensitive Hypertension, 786

Rats, inbred WKY
Atrial Natriuretic Peptide and C-Type Natriuretic Peptide in Spontaneously Hypertensive Rats and Their Vasorelaxing Actions In Vitro, 903
Perindopril Changes the Mesenteric Pressure Profile of Conscious Hypertensive and Normotensive Rats, 325

Receptors, adrenergic
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992
Alteration of Response to Neuropeptide Y in the Nucleus Tractus Solitarius of Spontaneously Hypertensive Rats, I-93
Altered Protein Kinase C Regulation of Phosphoinositide-Coupled Receptors in Deoxycorticosterone Acetate–Salt Hypertensive Rats, 722
Association Analysis of Restriction Fragment Length Polymorphism for α_2-Adrenergic Receptor Genes in Essential Hypertension in Japan, I-203
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38
Human Insulin–Mediated Enhancement of Vascular β-Adrenergic Responsiveness, 551
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: II. Renal G Proteins in Male and Female Rats, 653
Sex Influence on Renal α_2-Adrenergic Receptor Density in the Spontaneously Hypertensive Rat, 607

Receptors, angiotensin
Angiotensin Receptor Regulates Cardiac Hypertrophy and Transforming Growth Factor-β_1 Expression, 587
Distribution of Type 1 Angiotensin II Receptor Subtype Messenger RNAs in the Rat Fetus, 137
Effects of Angiotensin Receptor Subtype Inhibitors on Plasma Angiotensin Clearance, 853
Glucocorticoid Increases Angiotensin II Type 1 Receptor and Its Gene Expression, 25
In Vivo Occupancy of Angiotensin II Subtype 1 Receptors in Rat Renal Medullary Interstitial Cells, 838
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Regulation of Angiotensin II Receptors in Rat Brain During Dietary Sodium Changes, I-137
Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Receptors, atrial natriuretic peptide
Modulation of Exogenous and Endogenous Atrial Natriuretic Peptide by a Receptor Inhibitor, 613
Regulation of Natriuretic Peptide Receptor A and B Expression by Transforming Growth Factor-β_1 in Cultured Aortic Smooth Muscle Cells, 908

Receptors, endothelin
C-Type Natriuretic Peptide Upregulates Vascular Endothelin Type B Receptors, 936
Endothelin-1–Selective Receptor in the Arterial Intima of Patients With Hypertension, 288
Endothelin Mobilizes Calcium and Enhances Glucose Uptake in Cultured Human Skeletal Myoblasts and L6 Myotubes, 1075

Receptors, purinergic
C-Type Natriuretic Peptide Neuromodulates Independently of Guanylyl Cyclase Activation, 38
Renal Arteriolar Angiotensin Responses During Varied Adenosine Receptor Activation, I-114

Receptors, sensory
Renal Sensory Receptor Activation by Calcitonin Gene–Related Peptide, 1063

Receptors, vasopressin
Pressor Mechanisms in Adriamycin-Induced Nephropathy With Hypertension in Rats, I-246

Renal artery obstruction
Renal Artery Stenosis and Ischemia: Effect on Renal Blood Flow and Extraction Fraction, 96
Renal Atrophy and Arterial Stenosis: A Prospective Study With Duplex Ultrasound, 346

Renal circulation
Abnormal Pressure Natriuresis in the Dog Model of Obesity-Induced Hypertension, I-8
Accelerated Decline in Renal Perfusion With Aging in Essential Hypertension, 351
Decreased Sensitivity to Renal Interstitial Hydrostatic Pressure in Dahl Salt-Sensitive Rats, 1082
Effects of a Metalloendopeptidase-24.15 Inhibitor on Renal Hemodynamics and Function in Rats, I-235
Microalbuminuria in Salt-Sensitive Patients: A Marker for Renal and Cardiovascular Risk Factors, 195
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97
Nitric Oxide Influences Blood Flow Distribution in Renovascular Hypertension, I-34
Pressure Range for Release of Renomedullary Depressor Substance in Rabbits, 639
Renal Arteriolar Angiotensin Responses During Varied Adenosine Receptor Activation, I-114
Renal Atrophy and Arterial Stenosis: A Prospective Study With Duplex Ultrasound, 346
Responses to Converting Enzyme and Renin Inhibition: Role of Angiotensin II in Humans, 44
Salt Sensitivity in Hypertension: Renal and Cardiovascular Implications, 531

Renal failure
Hypertension in the Elderly: Only the End of the Beginning, 286

Renal function (See Kidney)

Renal veins
Removal of Endothelium-Dependent Relaxation by Antibody and Complement in Afferent Arterioles, I-54

Renin
DuP 753 Is More Effective Than Captopril on Baroreceptor Function in High-Renin Hypertension, I-64
Hypertension in the Transgenic Rat TGR(mRen-2)27 May Be Due to Enhanced Kinetics of the Reaction Between Mouse Renin and Rat Angiotensinogen, 422
Intraglomerular Expression of α-Smooth Muscle Actin in Aging Mice, 889
Nitric Oxide Participates in Calcium-Mediated Regulation of Renin Release, I-40

Regulation of Aldosterone Secretion in Hypertensive Blacks, 179
Renal Effects of Captopril and Nitrendipine in Transgenic Rats With an Extra Renin Gene, 626
Renal Response to Amino Acid Infusion in Essential Hypertension, I-225
Role of Nitric Oxide in the Renin and Heart Rate Responses to β-Adrenergic Stimulation, I-49
Transgenes, Hypotheses, and Hypertension, 428
Vascular Renin in the Guinea Pig: Suppression by the Renin Inhibitor Remikiren, 861

Renin-angiotensin system
Changes in Renal Angiotensin II Receptors in Spontaneously Hypertensive Rats by Early Treatment With the Angiotensin-Converting Enzyme Inhibitor Captopril, 819
Clonidine Reverses the Slowly Developing Hypertension Produced by Low Doses of Angiotensin II, 844
Distribution of Type 1 Angiotensin II Receptor Subtype Messenger RNAs in the Rat Fetus, 137
Effects of Angiotensin Receptor Subtype Inhibitors on Plasma Angiotensin Clearance, 853
Hypertension in the Transgenic Rat TGR(mRen-2)27 May Be Due to Enhanced Kinetics of the Reaction Between Mouse Renin and Rat Angiotensinogen, 422
Ontogeny of Somatic Angiotensin-Converting Enzyme, 369
Oxytocic Effect of Trypsin on the Isolated Rat Uterus, I-250
Physiopathogenesis of Acute Aortic Coarctation Hypertension in Conscious Rats, I-78
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Salt-Induced Hypertension in Normotensive Spontaneously Hypertensive Rats, 791
Salt-Regulating Hormones in Young Normotensive Obese Subjects: Effects of Saline Load, I-20
Structural Remodeling in Hypertensive Heart Disease and the Role of Hormones, 869
Transgenes, Hypotheses, and Hypertension, 428

Reproducibility of results
Factors Affecting Ambulatory Blood Pressure Reproducibility: Results of the HARVEST Trial, 211
Potential Problems With the Random-Zero Sphygmomanometer, 254

Research
Hypertension in the Elderly: Only the End of the Beginning, 286

Respiration
Altered Cardiorespiratory Transfer in Hypertension, 104

Restriction fragment length polymorphisms
Association Analysis of Restriction Fragment Length Polymorphism for α_2-Adrenergic Receptor Genes in Essential Hypertension in Japan, I-203

Retina
Quantification of Retinal Capillary Density and Flow Velocity in Patients With Essential Hypertension, 464

Retinal vessels
Quantification of Retinal Capillary Density and Flow Velocity in Patients With Essential Hypertension, 464

Risk factors
Correlates of Blood Pressure in Community-Dwelling Older Adults: The Cardiovascular Health Study, 59
Microalbuminuria in Salt-Sensitive Patients: A Marker for Renal and Cardiovascular Risk Factors, 195

RNA, messenger
Angiotensin Receptor Regulates Cardiac Hypertrophy and Transforming Growth Factor-β_1 Expression, 587
Gene Expression of 11β-Hydroxysteroid Dehydrogenase in the Mesenteric Arteries of Genetically Hypertensive Rats, 577
Glucocorticoid Increases Angiotensin II Type 1 Receptor and Its Gene Expression, 25
Mechanism by Which Angiotensin II Stabilizes Messenger RNA for Angiotensinogen, I-120
Modulation of Renin-Angiotensin and Kallikrein Gene Expression in Experimental Hypertension, I-131

S

Sarcoplasmic reticulum
Effects of Sarcoplasmic Reticulum Calcium Pump Inhibitors on Vascular Smooth Muscle, I-156

Sequence analysis
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992

Serotonin
Furosemide Elicits Nonuniform Reflex Responses Via Cardiac Sympathetic Afferents, 924
Vasomotor Responses in Cyclosporin A–Treated Rats After Chronic Angiotensin Blockade, 832

Sex characteristics
Sex Influence on Renal α_2-Adrenergic Receptor Density in the Spontaneously Hypertensive Rat, 607

Sex chromosomes
Hypertension in the Spontaneously Hypertensive Rat and the Sex Chromosomes, 161

Shock, septic
Nitric Oxide Synthase Isozymes: Characterization, Purification, Molecular Cloning, and Functions, 1121

Signal transduction
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402

Sleep
Systemic Hemodynamics During Sleep in Young or Middle-aged and Elderly Patients With Essential Hypertension, 167

Sodium
Abnormal Pressure Natriuresis in the Dog Model of Obesity-Induced Hypertension, I-8
Are Renal Hemodynamics a Key Factor in the Development and Maintenance of Arterial Hypertension in Humans? 3
Blunted Natriuretic Response to a High-Sodium Meal in Obese Dogs: Role of Renal Nerves, 997
Body Mass Index and Associations of Sodium and Potassium With Blood Pressure in INTERSALT, 729
Genetic Contamination of Dahl SS/Jr Rats: Impact on Studies of Salt-Sensitive Hypertension, 786
Hyperinsulinemia in Normotensive Offspring of Hypertensive Parents, I-12
Increased Activity of the Mg^{2+}/Na^+ Exchanger in Red Blood Cells From Essential Hypertensive Patients, 987
Increased Cytosolic Sodium and Reduced Na,K-ATPase Activity in Transgenic Rats, I-198
Insulin and Renal Sodium Retention in Hypertension-Prone Men, 313
Insulin Blunts the Natriuretic Action of Atrial Natriuretic Peptide in Hypertension, 1054
Insulin Levels Are Similar in Obese Salt-Sensitive and Salt-Resistant Hypertensive Subjects, I-1
Modulation of Exogenous and Endogenous Atrial Natriuretic Peptide by a Receptor Inhibitor, 613
Rat Renal Interstitial Bradykinin, Prostaglandin E_2, and Cyclic Guanosine 3′,5′-Monophosphate: Effects of Altered Sodium Intake, 1068
Regulation of Aldosterone Secretion in Hypertensive Blacks, 179
Renal Sodium Handling in Patients With Untreated Hypertension and White Coat Hypertension, 496
Responses to Converting Enzyme and Renin Inhibition: Role of Angiotensin II in Humans, 44
Salt Sensitivity in Hypertension: Renal and Cardiovascular Implications, 531

Sodium channels
Blockade of Distal Nephron Sodium Transport Attenuates Pressure Natriuresis In Dogs, 1040

Sodium-potassium pump
Chronic Blood Pressure Effects of Bufalin, a Sodium-Potassium ATPase Inhibitor, in Rats, I-106

Somatotropin
Increased Expression of Growth Hormone Receptor mRNA and Insulin-like Growth Factor-I mRNA in Volume-Overloaded Hearts, 884

Spectral analysis (See Spectrum analysis)
Spectrum analysis
β-Adrenergic Blocking Treatment and 24-Hour Baroreflex Sensitivity in Essential Hypertensive Patients, 992
Altered Cardiorespiratory Transfer in Hypertension, 104
Effects of Age and Hypertension on Autonomic Nervous Regulation During Passive Head-Up Tilt, I-82
Short-term Variability of Blood Pressure and Heart Rate in Borderline and Mildly Hypertensive Subjects, 18
Streptozocin
Effect of Administration of Insulin on Streptozotocin-Induced Diabetic Hypertension in Rat, 1046
Stress
Left Ventricular Mass and Cardiovascular Reactivity in Young Men, I-168
Stroke (See Cerebrovascular disorders)
Superoxide
Cyclosporine Produces Endothelial Dysfunction by Increased Production of Superoxide, 957
Swine
Dose-Related Effects of Magnesium on Myocardial Function in the Neonate, 174
Sympathetic nervous system
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Chronic Central Versus Peripheral Ouabain, Blood Pressure, and Sympathetic Activity in Rats, 1087
Chronic Hyperinsulinemia Augments Deoxycorticosterone Acetate–Salt Hypertension, I-16
Dietary Calcium and Blood Pressure in Experimental Models of Hypertension: A Review, 513
Differential Effects of Digitalis on Chemoreflex Responses in Humans, 302
Effects of Fludrocortisone on Sympathetic Nerve Activity in Humans, 123
Hypertension Induced by Nitric Oxide Synthesis Inhibition Is Renal Nerve Dependent, 971
Left Ventricular Mass and Cardiovascular Reactivity in Young Men, I-168
Losartan Inhibits Sympathetic and Cardiovascular Responses to Carotid Occlusion, 827
Mechanism of Cyclosporine-Induced Sympathetic Activation and Acute Hypertension in Rats, 667
Neural Effects on Renal Blood Flow During Acute Hypotension Vary With Antihypertensive Drugs, I-97
Nitrosyl Factors Mediate Active Neurogenic Hindquarter Vasodilation in the Conscious Rat, 962
Ontogenesis of Sympathetic Responsiveness in Spontaneously Hypertensive Rats: II. Renal G Proteins in Male and Female Rats, 653
Renal and Cardiovascular Mechanisms of Hypertension in Obesity, 381
Sympathetic Baroreceptor Responses After Chronic N^G-Nitro-L-Arginine Methyl Ester Treatment in Conscious Rats, 982
Vasoconstriction With Norepinephrine Causes Less Forearm Insulin Resistance Than a Reflex Sympathetic Vasoconstriction, 1006
Sympatholytics
Mechanisms Involved in the Cardiovascular-Renal Actions of Nitric Oxide Inhibition, 951

T

Tachycardia
DuP 753 Is More Effective Than Captopril on Baroreceptor Function in High-Renin Hypertension, I-64
Telemetry
Chronic Insulin Administration Elevates Blood Pressure in Rats, 1012
Tetraethylammonium compounds
Increased Barium Influx and Potassium Current in Stroke-Prone Spontaneously Hypertensive Rats, 1091
Thalamic diseases
Diurnal Blood Pressure Variation and Hormonal Correlates in Fatal Familial Insomnia, 569
Thiazoles
Evidence Against a Role of Insulin in Hypertension in Spontaneously Hypertensive Rats: CS-045 Does Not Lower Blood Pressure Despite Improvement of Insulin Resistance, 1071
Thrombin
Blood Pressure Inversely Correlates With Thrombin-Evoked Calcium Rise in Platelets, 703
Tissue culture
Is Ouabain an Authentic Endogenous Mammalian Substance Derived From the Adrenal? 632
Tomography
Role of Hypertension in Asymptomatic Cerebral Lacunae in the Elderly, I-259
Tonometry
Carotid Artery Distensibility and Distending Pressure in Hypertensive Humans, 878
Transcription, genetic
Mechanism by Which Angiotensin II Stabilizes Messenger RNA for Angiotensinogen, I-120
Transfection
New Perspectives in Hypertension Research: Potentials of Vascular Biology, 1132
Transforming growth factor β
Expression of Nitric Oxide Synthase by Cytokines in Vascular Smooth Muscle Cells, I-45
Regulation of Natriuretic Peptide Receptor A and B Expression by Transforming Growth Factor-β_1 in Cultured Aortic Smooth Muscle Cells, 908
Transforming Growth Factor-β1 Gene Activation and Growth of Smooth Muscle From Hypertensive Rats, 593
Triglycerides
High-Fructose Feeding Elicits Insulin Resistance, Hyperinsulinism, and Hypertension in Normal Mongrel Dogs, 456
Tumor necrosis factor
Expression of Nitric Oxide Synthase by Cytokines in Vascular Smooth Muscle Cells, I-45
Turpentine
Angiotensinogen: An Acute-Phase Protein? I-126
Twins
Hypocalcemia and Pregnancy-Induced Hypertension Produced by Low-Calcium Diet, 695
Twenty-four–Hour Blood Pressure and Heart Rate Profiles in Humans: A Twin Study, 244

U

Ultrasonics
Renal Atrophy and Arterial Stenosis: A Prospective Study With Duplex Ultrasound, 346
Ultrasonography
Carotid Artery Distensibility and Distending Pressure in Hypertensive Humans, 878
Long-term Nitric Oxide Synthase Inhibition and Distensibility of Carotid Artery in Intact Rats, 967
Three-dimensional Echocardiography: Advances for Measurement of Ventricular Volume and Mass, I-172
Ultraviolet rays
A Photoactivable Source of Relaxing Factor in Genetic Hypertension, 894
Uterus
Biochemical Evidence of a Kallikrein-like Activity in Rat Reproductive Tissues, I-193

V

Vagotomy
Furosemide Elicits Nonuniform Reflex Responses Via Cardiac Sympathetic Afferents, 924
Vanadates
Vanadyl Sulfate Prevents Fructose-Induced Hyperinsulinemia and Hypertension in Rats, 308
Vascular resistance
Cyclosporine Produces Endothelial Dysfunction by Increased Production of Superoxide, 957
Dose-Dependent Effects of Perindopril on Blood Pressure and Small-Artery Structure, 659

Insulin Levels Are Similar in Obese Salt-Sensitive and Salt-Resistant Hypertensive Subjects, I-1
Left Ventricular Mass and Cardiovascular Reactivity in Young Men, I-168
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Transduction Mechanisms Involved in the Regulation of Myogenic Activity, 1096
Vascular Kallikrein in Deoxycorticosterone Acetate–Salt Hypertensive Rats, I-185
Vascular Renin in the Guinea Pig: Suppression by the Renin Inhibitor Remikiren, 861
Vascular Responsiveness to Nitric Oxide Synthesis Inhibition in Hypertensive Rats, 744

Vasoconstriction
Defective Modulation of Angiotensin II–Induced Renal Vasoconstriction in Hypertensive Rats, 329
Hypertension Induced by Brain Grafts From Fetal Spontaneously Hypertensive Rats, 765
Pressure-Flow Curves Reflect Arteriolar Responses in Perfused Rat Hindquarters, 223
Vasoconstrictor Action of Angiotensin I–Convertase and the Synthetic Substrate (Pro^{11},D-Ala^{12})-Angiotensin I, 857

Vasoconstrictor agents
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402

Vasodilation
A Local Kallikrein-Kinin System Is Present in Rat Hearts, 919
Cell-to-Cell Communication Coordinates Blood Flow Control, 1113
Long-term Cardiovascular Role of Nitric Oxide in Conscious Rats, 185
Nitric Oxide Regulates Renal Hemodynamics and Urinary Sodium Excretion in Dogs, 619

Vasodilator agents
Parathyroid Hormone Analogues Inhibit Calcium Mobilization in Cultured Vascular Cells, 402

Vasomotor system
Transduction Mechanisms Involved in the Regulation of Myogenic Activity, 1096

Vasopressins
Blood Pressure–Lowering Effect of an Orally Active Vasopressin V1 Receptor Antagonist in Mineralocorticoid Hypertension in the Rat, 737
Mechanisms Involved in the Cardiovascular-Renal Actions of Nitric Oxide Inhibition, 951
OPC-21268, a Vasopressin V_1 Antagonist, Produces Hypotension in Spontaneously Hypertensive Rats, 200
Physiopathogenesis of Acute Aortic Coarctation Hypertension in Conscious Rats, I-78

Ventilation
Differential Effects of Digitalis on Chemoreflex Responses in Humans, 302

Ventricular function
Dose-Related Effects of Magnesium on Myocardial Function in the Neonate, 174
Increases in Cardiac Kinins as a New Mechanism to Protect the Heart, 419

Ventricular mass
Three-dimensional Echocardiography: Advances for Measurement of Ventricular Volume and Mass, I-172

Veterans
Regional Differences in Mortality During 15-Year Follow-up of 11 936 Hypertensive Veterans, 431

von Willebrand factor
Removal of Endothelium-Dependent Relaxation by Antibody and Complement in Afferent Arterioles, I-54

Y

Yohimbine
Sex Influence on Renal α_2-Adrenergic Receptor Density in the Spontaneously Hypertensive Rat, 607
